1. Novelty

The inventions claimed in claims 1-16, that is, a pair of primers specific to mycobacterial species, a polynucleotide of a 605-bp hsp 65 gene fragment, and a method for the identification of mycobacterial species and a diagnostic kit using the same, are considered to be novel over the prior art cited in the International Search Report (PCT Article 33(2)).

2. Inventive Step

The inventions claimed in claims 1-16, that is, a pair of primers specific to mycobacterial species, a polynucleotide of a 605-bp hsp 65 gene fragment, a method for the identification of mycobacterial species and a diagnostic kit using the same, cannot be readily invented by a person skilled in the art from the prior art cited in the International Search Report.
